Supporting integrity of the scholarly record: Our commitment to curation and selectivity in the Web of Science

More than 50 journals already de-listed this year for failing to meet our quality selection criteria

DR NANDITA QUADERI
Editor-in-Chief & Vice President, Web of Science
Clarivate

MARCH 20, 2023

3 MINUTE READ

We have the important responsibility of providing our customers with trustworthy intelligence to help them transform the world for the better. The need for high-quality data from rigorously selected sources is becoming ever more important as the scholarly record becomes increasingly polluted.

A trusted record of research is essential for the global R&D community to effectively use published research outcomes to elevate ideas that will benefit everyday life. The

Access Master Journal List

1 <https://mjl.clarivate.com/>

Browse, search, and explore journals indexed in the *Web of Science*

The *Master Journal List* is an invaluable tool to help you to find the right journal for your needs across multiple indices hosted on the *Web of Science* platform. Spanning all disciplines and regions, *Web of Science Core Collection* is at the heart of the *Web of Science* platform. Curated with care by an expert team of in-house editors, *Web of Science Core Collection* includes only journals that demonstrate high levels of editorial rigor and best practice. As well as the *Web of Science Core Collection*, you can search across the following specialty collections: *Biological Abstracts*, *BIOSIS Previews*, *Zoological Record*, and *Current Contents Connect*, as well as the *Chemical Information* products.

On-hold Flag in the Master Journal List

Introduced to provide full transparency to Web of Science™ users.

The screenshot shows a journal profile page with a white background and a light gray border. At the top, there is a header area with the journal title. Below the header, there is a prominent orange 'On Hold' flag with a small information icon. Underneath the flag, the page lists the publisher, ISSN/eISSN, and Web of Science Core Collection status. At the bottom right of the page, there are two buttons: 'Share This Journal' and 'View profile page'.

The modal dialog box has a white background and a gray border. It features a title 'On Hold' in bold. The main text explains that concerns have been raised about the quality of the content, and the journal is being re-evaluated. It states that new content will not be indexed during the re-evaluation. It then informs the publisher of the outcome and lists two possible scenarios: removal from coverage or continued coverage. A final paragraph explains that if the journal meets the criteria, missing content will be indexed, but if removed, content will not be backfilled. A 'Close' button is located at the bottom right of the modal.

On Hold

Concerns have been raised about the quality of the content published in this journal. The journal is being re-evaluated according to our selection criteria; new content will not be indexed during the course of the re-evaluation.

When the evaluation is complete, the publisher will be informed of the outcome and the journal will either:

- be removed from coverage if it no longer meets the quality criteria
- or remain covered if it continues to meet the quality criteria.

If the journal meets the quality criteria, any missing content will be indexed. If the journal is removed from coverage, content will not be backfilled. In the most serious cases of breaches in a journal's editorial standards, as determined by our selection criteria, published content may be removed from Web of Science. Timeframes for completing a re-evaluation will depend on the particular circumstances of each case.

You will have to create an account first (preferably with your Web of Science credentials)

Good citation behavior

Learn how to reference, where to reference, and when to reference, and gain an understanding of what citation manipulation is and how to prevent it.

This course is for authors, peer reviewers and editors.

~30 min to complete

An introduction to peer review

Learn what's expected of you as a peer reviewer, and how to respond to peer review comments as an author.

This course is aimed at early career researchers that have just started or are about to start publishing and reviewing.

~30 min to complete

Reviewing in the Sciences

Learn how to review a typical research article, what to look for in each section of a manuscript by using peer review guidelines, and how to structure your peer review report by using a template.

This course is for early career researchers that would like to learn how to peer review.

Reviewing in the Humanities

Learn how to review manuscripts such as monographs and literature reviews, what to look for in each section of a manuscript by using peer review guidelines, and how to structure your peer review report by using a template.

This course is for early career researchers that would like to learn how to peer review.

Co-reviewing with a mentor

This course is a tool to facilitate co-reviewing with your PhD or postdoc advisor. You'll complete a review by following a peer review template, then revise it together with your mentor.

This course is for published authors who would like to start reviewing for journals.

Mentoring in peer review

Help train the next generation of peer reviewers through mentoring. This short course gives you tips on the kind of mentoring and mentor feedback that is useful in peer review, and provides you with a fillable mentor feedback form.

This course is for senior researchers and academics that want to mentor early career researchers through the peer review process.

An introduction to ethical publishing behavior

Learn about ethical behavior around conducting and publishing research such as what constitutes authorship, research misconduct, declaring conflicts of interest, and identifying unconscious biases during peer review.

This course is for authors, peer reviewers and editors.

~60 min to complete

How to find the right journal for your research (using actual data)

JOANNA WILKINSON
Clarivate

Want to help your research flourish? We share tips for using publisher-neutral data and statistics to find the right journal for your research paper.

The right journal helps your research flourish. It puts you in the best position to reach a relevant and engaged audience, and can extend the impact of your paper through a high-quality publishing process.

A few general tips:

1. Start speaking with your colleagues, supervisors and librarians
2. Explore journal suggester tools
3. Is the journal trustworthy? (<https://thinkchecksubmit.org/> and avoid “predatory publishers”)
4. Investigate journal indexing and discoverability
5. Narrow down your list getting familiar with the journal content, scope, policies, audience, etc.
6. Understand journal metrics
